

PACIFIC TERMINAL FOR POOL WHEAT

Alberta Wheat Pool Gets Lease on Elevator at Vancouver

Under the terms of a lease recently agreed upon between the Pool and the Vancouver Harbor Board, No. 3 terminal, elevator at Vancouver, owned by the Canadian government, will pass to the control of the Alberta Wheat Pool August 1, 1937, for one year, at a yearly rental of one hundred thousand dollars. This terminal has a capacity of 1,500,000 bushels, and cost in excess of \$2,000,000 to build.

No. 1 terminal was leased by a private grain man at an annual rental of \$145,000. It has a capacity of 2,000,000 bushels. The securing of the lease on No. 3 terminal elevator provides the Pool with a total terminal capacity on the Pacific coast of 3,700,000 bushels. The Prince Rupert terminal has a capacity of 1,500,000 bushels.

With 142 line elevators in Alberta and two in British Columbia, the Pool will be in a better position to more adequately handle its members' grain. C. M. Hall, general manager of Alberta Wheat Pool, Ltd., and W. J. Jackson and L. H. Hutchinson, directors of the Pool, are in Winnipeg this week negotiating with private elevator companies who are offering to sell country elevators at certain points in the province where the Pool wishes to serve its members with Pool elevators.

Rosemary News

ROSEMARY, April 14—Ray Norton and Doc Eaton started plowing Wednesday. Dave MacMillan started plowing last week, but had to stop on account of the blizzard which blew on Friday.

Billy Joyce took two loads of furniture to Bassano on Monday where he intends to live in the future.

Louis Conn is driving to Calgary in his car Saturday.

W. D. Elliott was a Bassano visitor on Wednesday.

Mrs. Norton is going to the hospital on Thursday where she will undergo an operation on Saturday.

Louis Conn was a Bassano visitor last Monday.

Roy Eastman is moving to the Calgary farm two miles north of Rosemary next week.

Mrs. Wilson was in Bassano on Thursday.

Miss Margaret Norton, who has been visiting her grandparents in Idaho, returned home last Friday.

Several young people from Rosemary attended the dance at Countess last Friday.

Several more C. P. R. surveyors came on Monday and are now busy staking out the line for the new railroad.

Hussar News

HUSSAR, April 13—Mrs. L. L. Woodford and daughter Peggy were passengers on Monday night's train from Calgary.

Mr. and Mrs. A. A. Clifford returned to Calgary Tuesday and returned Friday.

Mr. and Mrs. L. P. Christensen and children moved from Arrowwood Sunday and visited several hours with friends here.

C. Merrifield and children returned to Bassano Sunday to visit Mrs. Meyerson, who is in the Municipal Hospital.

Five hundred was played at ant tables at the home of Mrs. A. Anderson Thursday afternoon. The first prize was won by Mrs. A. Clifford and the booty by Mrs. Will Kuchie.

Mrs. Severn, who is moving to Rockyford soon, was presented with a beautiful silver bread tray by the Ladies Aid.

Mrs. Margaret Bush came from Pullman on Thursday, and went out to her farm where the auction sale of machinery, horses, etc., of the estate was held.

Dr. Ferguson, of Calgary, conducted the church service here Sunday evening.

R. Holland unloaded a carload of John Deere tractors Saturday, and has them lined up by his store.

A. J. Bell spent the week-end with his family in Bassano.

Born to Mr. and Mrs. C. Merrifield, a baby boy, on Tuesday, April 12.

The community sale in town Tuesday was well attended.

The Sunday school here will have an Easter program Sunday afternoon at 2 o'clock.

The public house here was closed for the Easter vacation April 13, and open again Tuesday, April 14.

Don't forget the Hussar stampede May 24th.

Nature's Playground

Depicted in Detail on New Map of Lake Louise District

The Topographical Survey, Department of the Interior, Ottawa, has just issued a new map sheet of very fine appearance, which is the Lake Louise sheet of the National Topographic series. The area covered lies between latitudes 50 degrees 15 minutes and 51 degrees 30 minutes, and longitudes 116 degrees and 117 degrees 30 minutes. This district is already fairly well known to mountaineers and trans-Canada travellers, but the publication of this map will undoubtedly bring to the attention of many others the many attractions which are offered to the travelling public in this delightful park area. Portions of Rocky Mountain Park, Yoho Park, and Kootenay Park are shown, with the various trails to the various spots of interest.

CONFIDENT CAN BUILD A SWIMMING POOL

Kick-off to Pool Now on Sale and Money is Coming In—Board of Trade Has a Busy Session

Geo. H. Travis, chairman of the swimming pool committee, reported at the Board of Trade meeting Wednesday noon in the Hunter Hotel that the work of his committee was coming along swimmingly, and everything looked rosy. Mr. Travis said the committee now had a bank account, and that they were confident that enough money could be raised to build a real good, up-to-date swimming pool located on the water and several lines. He reported the committee was investigating several proposed locations for the pool, and getting estimates on the cost, and these would be turned over to the board for their consideration. In the meantime the funds to finance the proposition were coming in, and so difficulty was anticipated in getting the necessary money.

New Committee The secretary reported that a capital committee had been appointed consisting of A. McKee, E. K. Picken, W. J. Smith, J. H. Stiles, and H. W. Ford.

Mr. Johnston was appointed to succeed J. P. MacCallum on the entertainment committee.

A. McKee brought up the subject of improving the cemetery grounds, and a motion was passed that the public affairs committee be instructed to acquire into the feasibility of getting water in the cemetery, and the cost of improvement.

Dr. B. E. Barlow introduced the subject of taking care of the trees on the streets, and the committee was instructed to look after the matter of ridding the streets of dead trees.

The committee was instructed to look after the matter of ridding the streets of dead trees.

Gem News

OHM, April 13—J. J. Brown, C.P.R. drayage operator, with Mrs. Brown and children, will make their home for the summer in the Dewy Marquette house. They will arrive in a few days.

Mr. and Mrs. Grayson recently arrived from Scotland, landed in the Colony during the week. They will make their home on the Kluckman farm.

Miss Hilda Handlauer (the niece of Mr. H. Robson).

Wm. Marshall, in charge of the Imperial Oil truck, was a very early bird on Tuesday morning. He was delivering gasoline in Gem before 9 a.m.

Mr. and Mrs. H. Schreiber were Sunday afternoon callers on their new neighbors, Mr. and Mrs. Deikmann.

J. J. Brown and Mrs. Brown and family were Sunday evening callers on Mr. and Mrs. Deikmann.

Big U.P.A. bazaar and dance in the Gem school on Thursday evening. Bassano orchestra will be in attendance.

Mr. and Mrs. Deikmann enjoyed Friday with Mr. and Mrs. J. J. Brown, being dinner guests on that day.

The Gem consolidated school will close on Thursday afternoon for Easter holidays, and will reopen on Monday, April 25.

Due to the severe snowstorm of Saturday last the community sale and also the U. F. A. meeting, were both postponed. The sale will take place on Saturday afternoon, April 16, and the U. F. A. meeting will be held on Saturday evening in the Gem school.

Wm. Pollock, Ed Johnson, and P. Williamson were Tuesday visitors to Bassano.

On Wednesday morning E. Small, with L. Leandre, will drive quite a number of horses to Drumheller. These horses were disposed of a few weeks ago.

Mr. and Mrs. E. J. J. Brown and daughter Leona were Sunday dinner guests at the home of Mr. and Mrs. Deikmann.

C. Douglas, a student at the Mount Royal College, Calgary, arrived home on Saturday for the Easter holidays.

M. Bowman returned recently to this district, and will farm the Sherry Fryberger farm.

Joe Carney plans to farm the P. A. Carney place, and will move into the house in the near future.

GOLF NEWS

The links were popular last Sunday although a chilly wind was blowing. All the greens are dry now, and with a little work can be put in first class shape.

Work will still bring in several sloughs and low spots, but is drying up fast.

The golfers are being killed off, and last Sunday very few were to be seen on the links.

The rough holes are now being filled up, and the fairway cleared of weeds and long grass.

Wm. Marshall, in charge of the Imperial Oil truck, was a very early bird on Tuesday morning. He was delivering gasoline in Gem before 9 a.m.

MECHANICAL TEARS

First Shot on Town Irrigation Project Turned Last Tuesday

Marquardt Bros. contractors for the ditch work on the town irrigation system, started moving earth for the main ditch Tuesday afternoon, April 13.

The work began on 8th Avenue and 5th street, near the hospital, where the deepest ditch to be made. The reason for starting here is because the earth in the deepest ditch requires more time to settle and pack down solidly. The contractors are working toward from this point.

The work is under the supervision of H. G. Angell with M. D. Macdonald on hand to plan and direct the working toward from this point.

The contractors have men and steam working on the job. With good weather and everything working as planned, it is expected that the ditchwork, including the smaller ditches throughout the town, can be completed in six or seven weeks.

First White Man's Music in Canada

CHARLES MARSHALL, HARRIET WATKINS, JULIETTE GAULTIER

A musical sensation on a scale never before attempted in the history of Quebec will be held at the Chateau Frontenac, from May 20 to 22. The Festival will combine folk-songs and hand-drawn pictures, in a character, since it is the first time a folk-song festival has been staged anywhere in America in its natural setting with handicrafts. The National Museum of Canada, in co-operation with the Canadian Pacific Railway is organizing this festival on a very comprehensive scale.

Among the artists who will interpret the folk-songs are J. Campbell McInnes, of Toronto, who has been principal soloist with the Philadelphia, Chicago and Cleveland Orchestras, and Charles Marshall, of Montreal, who has toured both Canada and the United States; also Dr. Ernest MacMillan, director of the Orchestre Symphonique de Montreal; Healey Willan, Canadian composer, and Oscar O'Brien of Montreal, who have composed harmonizations of melodies and arrangements for orchestra, specially for the Festival.

The first white men to penetrate the east into the middle west came as explorers, under the leadership of such men as Le Salle, Radisson and Father Hennepin. The first white men to settle in the west were the French-Canadian voyageurs, who followed the St. Lawrence, the Ottawa, Lake Nipissing and the Great Lakes, singing as they went the songs of Old France. The songs have been preserved and are a popular factor in the life of the French-Canadian in Quebec. Their popularity is fast spreading throughout the world, and the radio programs featuring these songs have been exceedingly well received.

TENNIS NEWS

The courts are drying up rapidly, and it is expected that the work of rolling them and smoothing them down will begin again early.

The courts are in pretty fair shape and it will require only a few days work on the grounds before the game can be started.

A new set is being purchased this year, and also three sets of tapes.

**How far will your car go before the miles begin to tell?**

ALMOST any car will give you satisfactory results for the first 10,000 miles or so. But if you want the same fine service on through the second, third and many following tens of thousands of miles, buy a McLaughlin-Buick.

Accurate tests at the great Proving Ground of General Motors, where all cars are driven and examined, show McLaughlin-Buick's sturdy construction and powerful Valve-in-Head Engine still gaining in efficiency at the point in miles where other cars are distinctly on the down grade.

It is the care in McLaughlin-Buick design—the tests at the Proving Ground—to be sure a suggested change is right—the search for better and more durable performance constantly carried on—which are responsible.

Enormous volume and its savings make possible this extensive research and McLaughlin-Buick's superior construction. McLaughlin-Buick cars are built for big mileage on their speedometers—for greater satisfaction to their owners. Buy one for years of exceptional service.

Wallace J. Smith  
Editor and Publisher  
Subscription \$2.00 a year, \$2.50 to the outside states

Perhaps it isn't flattery when they say some modern girls are trying to put the lip.

It's nice to have a garden, and some men like to work off some of their surplus energy with a hoe or rake, but personally, we prefer a mansion or a midwife.

From New York comes the story of a man who gave his mother-in-law a lion. Surely this can't be where "The Lion shall lie down with the lamb."

Permanent waves for men are becoming more common. If you are bold you can now have them embossed with a quon fush.

They may be becoming more common but they are not so becoming for men.

By the irony of fate "Lucky Strike Farm," near Manyberries, was the scene of a fatal shooting accident last week when the eighteen year old wife of the hired man was shot through the heart. There may be nothing in a name, but there are times when a coincidence like this seems to have a significant aspect to man's superstition that has been handed down from the dark ages.

**SPREADING DISCOUNT**

The Northwest Grain Dealers Association continues to distribute propaganda condemning the wheat pool. Their latest effort to spread discontent among the farmers of western Canada is a little booklet called "Why the Hurry?" meaning why the hurry about signing the new wheat pool contract.

The booklet seeks to point out to the farmer the advantage of dealing with the grain trade instead of selling to the wheat pool. One of the claims made is that the average price on the open grain market for the past selling year was \$1.51, as against \$1.45 a bushel paid by the pool.

This is a fallacious argument. They get the average price by taking the daily closing price on the market each day, and dividing the total by the number of days—the result, \$1.51 a bushel.

The average price depends upon the quantity of wheat sold as well as the variation in price from day to day. The average price quoted by the grain trade is calculated on the selling year from about July 1925 to June 1926. Market quotations show that in the year 1925, between the middle of September and the middle of November the price of wheat was never higher than \$1.19 a bushel, and dropped as low as \$1.19 a bushel. And this is the period during which most farmers sold their wheat.

The grain trade method of calculating the average price is deliberately designed to mislead the farmer. It is a most inaccurate method of calculation. Take for example the market quotations over a four day period. During this time the closing price on No. 1 Northern was \$1.54, \$1.50, \$1.50 and \$1.47. Using the grain trade method of calculation the average price for the four day period would be \$1.48. But actually it is not.

The average price depends upon the amount of wheat sold as well as on the price obtained. The following table shows how this works out:

| price  | bushels | amount      |
|--------|---------|-------------|
| \$1.52 | 4,000   | \$6,080.00  |
| \$1.50 | 5,000   | \$7,500.00  |
| \$1.45 | 10,000  | \$14,500.00 |
| \$1.44 | 12,000  | \$17,280.00 |
|        |         | \$45,360.00 |

The average price calculated by the grain trade method would be \$1.48 a bushel, but the actual average is found by dividing \$45,360.00 by the 31,000 bushels sold, which gives a result of about 1.47 a bushel.

**FEMININE FLAIRS**

Miss Agnes McPhail, the lady member of the federal house had her war, the \$500,000 appropriation for cadet training in Etanaka would have been reduced to \$100. Miss McPhail contended that cadet training was militaristic, and resulted in teaching the youth of the country to shoot other human beings.

The energy of the esteemed lady member, if directed in other channels of effort, might really accomplish some good. One of the most evil influences on the morals of growing boys is the undesirable, wild and wooly type of moving picture. It is not an uncommon sight to see boys playing bandit and robber in imitation of the scenes flashed before their

eyes on the screen of the moving picture show. There is generally a raid or a hold-up, a shooting array with dead men scattered here and there about the landscape, and a torturing scene to make the young hero reveal where the gold is hidden. The scene of course, is never told, and the ending rarely arrives but in time. This calls for another gun battle, and the scene is generally rounded off with a hanging or two to make everybody happy.

This type of picture seems to possess a glamour that appeals to the boy. It is an unhealthy atmosphere for the plastic mind of the growing lad.

While with most boys it is probable that pictures of this kind have no evil effect, yet they are undesirable and may in some instances lead boys down the path of wrong-doing.

Here is a field of moral uplift work that calls for a champion of the calibre of Miss McPhail.

**EASTER.**

This year Easter falls on Sunday, April 17. The way in which Easter is determined is that of the first Sunday after the paschal full moon, the fourteenth day of the calendar moon, or the full moon which happens upon or next after March 21; and if the full moon happens on a Sunday, then Easter Day is the first Sunday following.

With Easter comes a joyous season of the year. It is a commemoration of the resurrection of Jesus Christ and as a memorial to the atonement wrought by his death on the cross.

R. K. Picken was in Calgary the early part of the week attending a conference of managers of the Canadian Bank of Commerce.

Leah Conn, of Rosemary, was fined \$10 and costs in Bassano police court last Monday for buying fire without having a license.

Mr. Lunan, accountant of the Bank of Commerce at Gleichen, was in charge of the Bassano branch for a couple of days this week during the absence of R. K. Picken.

Charlie Bethel has sold out his farm interests in the firm of Bolton & Bethel. He is moving a couple of railroads of stock and implements to his new purchase in the foothills.

C. H. Kerr, formerly of the Union Bank staff here, was in town for a couple of days this week. Mr. Kerr is now with the Standard Typewriter Co., of Calgary.

When car licenses are transferred to another car, or from seller of car to a buyer, such transfer must go on record at the provincial secretary's office at Edmonton, as required under the act.

There is no one allowed to cross the C.P.R. dam, not even on foot. This is a hardship and loss to the settlers of the Majorville district. Even the ferry south of Crowfoot is not yet running.

Members of the Women's Institute are this week learning basketry construction under the direction of Mrs. Woods. The classes are held morning and afternoon in the I. O. O. F. Hall.

## Local News

R. P. Cuthrie made a business trip to Calgary early in the week.

Riddle Stille, of Hussey, was in Bassano over Sunday.

M. B. Cummings is the new junior at the Canadian Bank of Commerce.

Irvin Young visited over Sunday with his parents in Gleichen.

A. G. Bond was in Calgary over the week-end.

Miss Violet Smith was a visitor to Calgary Saturday and Sunday.

Mrs. A. W. Flanagan, of Hutton is the guest of Mrs. Chas. McKinnon.

J. A. Fryberger was in from Gen on Tuesday.

H. D. Brown, is now manager of the Bolton farm, east of Cochrane.

George Groves and Jim Jordan were in from Majorville via Cluny ridge on Wednesday.

Harry Powers, formerly of Bassano and now of Calgary, was in Bassano or a short time last Friday.

Inspector Boyce left Tuesday for Lundan to inspect the schools of that district.

Born, to Mr. and Mrs. C. Morris, of Hussey, a son, on Tuesday, April 12, in the Bassano Hospital.

Mrs. A. F. MacCallum and children left on Monday for their new home in Gleichen.

E. C. Martin returned to his farm at Maple Lake last week after spending the winter at Spokane, Wash.

Roy Smith returned home Tuesday after a few days business trip to Cluny and points west.

Lewis Clark, of Hussey, visited at the home of his parents, Mr. and Mrs. W. S. Clark.

E. O. Teisland was in from his farm on the Bow, south of town, for repairs and supplies for spring work.

Charlie Wallermark and Bill Pollock, of Gen., were in town on Wednesday.

Fred Bertachy, Fred Rosen, and A. Pearson came in from East Majorville on Tuesday.

E. A. Provan, of Gleichen, was a visitor to the Bennett farm Saturday and Sunday.

Harry Holmes returned from Majorville where he has been doing some building on the Jordan ranch.

Frank Pragnoli is sporting a new Ford touring car bought from Roy Smith.

Sam Henderson leaves on Friday for the new place which he has purchased west of Okotoks.

School closed Thursday for the Easter holidays and will reopen on Monday, April 25.

Easter services will be held in Knox Church next Sunday, April 17, in the morning at 11 o'clock, and in the evening at 7:30.

D. L. Bennett, who is farming west of Lathum, came down from Banff where he has bought some more land, leaving his son Harry up there to get the place in shape.

## MEANTIME THE GOOSE THAT LAYS THE GOLDEN EGG

To kill the goose that lays the golden egg has passed into a proverb for foolishness, and yet we, patriotic and intelligent Canadians, are doing that very thing in allowing our forests to be burned to death.

We are doing even worse than the people of the proverb, for they at least had one dish of "roast goose," however costly, but our "roast" forest provides not a single meal for any human being. Presumably the man of the proverb did not injure the remainder of his flock, but we in burning our forests slay the agricultural goose that lays the largest golden egg of all, and we injure beyond calculation those other producers of golden eggs, Manufacturing, Banking, Transportation and Commerce, the Fur Trade and Tourist Traffic. And the worst of it is that we do not commit this crime because of any foolish theory about the source of the golden egg. We do it or permit it to be done, simply because we do not think as the poet truly says:

"Ere it wrought by want of thought As well as want of heart."

Our second greatest natural resource is not only in danger; it is actually burning up before our eyes. Our foresters, lumbermen, railway executives, bankers and leading men in every walk of life are calling aloud to arouse us to the situation.

"What can we do about it?" you ask. "Everything! We can stop forest fires now, and, by a little protection and attention, we can have our staged goose put forth new feathers and lay more and larger golden eggs next year than ever before, and keep on doing it as long as grass grows and water runs."

"And how shall we do this?"

Just the same as we stopped prairie fires in settled districts by the force of public opinion. When every man, woman and child in Canada, not only those who live inland and near the forest-areas but those on farms and in villages and towns and cities far away from the forests—yes, if even thirty per cent of the people of Canada decide in their own minds that forest fires must cease, fires will be cut in two this year. Small accidental fires there will be from time to time just as there are in the city, but the old and costly fallacy of forest fires as a dispensation of Providence will be gone for ever.

"And when will this come?"

Just as soon as a majority or even a good-sized minority determine to do their part in this matter. April 24 to 29 is Canadian Forest Week and a little earnest thought, a little getting together and talking with fellow citizens and neighbours and school children, will turn the scale and save this goose that lays the second largest golden egg of all our magnificent flock of Canada Geese.

## THIS BOY'S DAD WILL HAVE A HARD JOB SPANNING HIM

Six feet, 2 1/2 inches in height, weight 195 pounds, eight-year-old Robert Wadlow, of Alton, Illinois, lays claim to being the largest boy in the world for his age. When he entered kindergarten at the age of 5 he was wearing clothes for a 17 year old youth. He leads his class in school, and is in the fourth grade. Robert wants to become a movie actor.

*The New and Finer*  
**PONTIAC SIX**

**Its Smoothness and Beauty Will Thrill You**

THE announcement of a New and Finer Pontiac Six—built in the great, new General Motors plants—justifies high expectations. Yet even this scarcely prepares you for the thrill of real delight you experience as you see the New and Finer Pontiac Six, and ride in it for the first time. Here are all the smoothness, power and stamina for which Pontiac Six won such untold praise last year. Here is the economy for which Pontiac Six became so quickly renowned. Here is all that made Pontiac Six, in its first year, the greatest success of all motor car history. But in addition, here is a new BEAUTY—new, Fisher Bodies, lower, longer, more graceful; new, higher radiator, new, appealing shades of Duco. Here is a car that commands a second admiring look wherever it appears.

The New and Finer Pontiac Six is a car of dashing appearance, built to perform outstandingly. It merits your close inspection, as its new, lower prices warrant your serious consideration.

## PREVENT FOREST FIRES

**You May Lose Your Job If Forest Fires Continue Unchecked**

Hundreds of thousands of Canadian men and women depend upon the forests for their livelihood. You may be one of them. A lighted match, a cigarette butt, thrown down carelessly in the woods, or a campfire left smouldering, may cost you your job. It is up to you; be careful of fire when in the woods.

CHARLES STEWART  
Minister of the Interior,

**Save Your Forests**

**Only Chevrolet Could Do It**

ONLY Chevrolet—world's largest builder of gear-shift automobiles—could produce such a car as the Most Beautiful Chevrolet in Chevrolet History—could introduce such smooth, spirited performance—such beauty of line, such evident distinction, such unmistakable quality in a car at anywhere near Chevrolet price.

Only Chevrolet, with its enormous purchasing and manufacturing economies, could combine the beauty, the quality, the distinction and the performance of the Most Beautiful

Chevrolet, at such phenomenally low prices—the lowest prices for which Chevrolet has ever been sold in Canada.

## WORLD HAPPENINGS BRIEFLY TOLD

All restrictions imposed in Great Britain on account of the foot and mouth disease of cattle have been removed.

Information obtained from reliable sources in Montreal is to the effect that the Cuban Government will, in all likelihood, create a diplomatic post in Ottawa.

Mr. Thomas L. Thompson has arrived at New York to report his optimistic belief in his ability to build a yacht that will take the America Cup to England.

Grain reports from Vancouver for the season to April, 202,512,551 bushels, compared with 212,484,015 bushels for the same period a year ago.

The "Sale of beer bill," prepared by a joint committee of the House and Senate, which asked for the sale of beer by the state, was killed on second reading in the legislature.

Chief Justice McRae, who is the husband and father of Mr. M. J. Wilkins, United States electrical engineer, even has been named by a string of names at Washington.

Sir Christopher Pratt, High Commissioner in London for New Zealand, has been named as New Zealand's representative on the newly organized Pacific Cable.

Major H. D. D. Sogavare, with his 297-hp. air car, has been turned away in the hold of the liner Berkeley, announced shortly before sailing, that the car would be placed in a museum on reaching England.

One cruiser, six destroyers, five submarines, one mine sweeper, and two auxiliary vessels will be built by France between July 1, 1927, and June 30, 1932, under a bill passed by President Briand.

The vessels belong to the second series of France's naval program.

## Where Canada Leads

### World Demand for Products of Canadian Industries

During the last two years Canadian agriculture, mining, fishing, manufacture and transportation have been experiencing a fundamental prosperity which indicates an intense world demand for the varied products of Canadian industries. That a country with a population of less than 10,000,000 people should have exported \$1,271,000,000 worth of goods in 1925 and \$1,249,000,000 worth in 1926 is a remarkable achievement.

Canada is now the leader in the production of newsprint, asbestos, nickel, cobalt, and uranium, and produces the world's largest exportable wheat surplus. Since Canada also stands second in the number of telephones in use in the great cities of the world, and in the production of automobiles, and in the production of steel, it is evident that the prevailing prosperity is due to a healthy condition in many industries rather than to a temporary expansion in some single line.

## Increase Gas and Oil Output

### Alberta the Largest Producer of Oil and Gas in Canada

Preliminary figures on the production of natural gas and petroleum in the province of Alberta for 1925 are coming to the Canadian Government. Three of the statistics are: Natural gas production, 30,485,497 cubic feet; coal, valued at \$2,031,101; Petroleum production, 217,083 barrels, valued at \$46,348.

Alberta is not the largest producer of oil and gas in Canada. In 1925 the production of gas amounted to approximately 3,000,000 cubic feet, and the production of oil 152,000 barrels.

According to an oil business superintendent, who children of both sexes were brought to the front at once, they would be in the children's hands, but when she grew up, she would be a little man thinks that he is a little man.

## A Nerve Racking Occupation

### Sailors on Submarine Have Physical Endurance Tested to Limit

Life in a submarine forms the subject matter of an article by M. McNeil in the Spectator. Those who have made a voyage in a "U-boat" know, as he writes, what it feels like to go below the sea.

The monthly may be relieved by having that diver quickly in a submarine feels much like descending in a fast, noisy elevator from the top floor of a New York skyscraper. There is the same curious sensation of upward pressure on the soles of the feet during the descent, and, usually, a similar slight lift is noticed on reaching the bottom.

In calm weather a submarine below the surface travels without rolling or pitching, and there is no vibration of any kind. She remains almost as quiet as when at anchor in harbor. Only the hum of the motors and an occasional click of the steering gear disturbs the stillness. If the sea is rough, however, the ship rolls diagonally even at a depth of 20 feet and the water grates noisily in the conning tower.

On calm weather a submarine below the surface travels without rolling or pitching, and there is no vibration of any kind. She remains almost as quiet as when at anchor in harbor. ## New Type Airplane

### Fashioned Like Gull

Aviator Constructs One Which Can Land in Smallest Possible Field. A new type airplane, designed to take off from "a field the size of a pocket handkerchief," and for landing on the roofs of buildings is ready for testing at New York.

Leonard W. Bonney, trained in 1919 by Orville Wright and one of the veteran pilots of the country, has completed the machine after two years' efforts. Tests he said, will prove whether he is "just another bird" or "10 years ahead of every body else" as a designer.

The machine is fashioned after a sea gull. Many of the principles of bird flight, particularly those for making quick stops in alighting, were used in the new design.

As soon as the plane touches the ground the wings take the support of the ground, and the machine and its pilot are able to stop almost at once. A further application of this principle folds the wings back along the fuselage until the machine can run into a hangar with a door 15 feet wide.

The elevators may be spread in front of the wings to allow forward motion. The wings and tail surfaces are of duralumin.

## She Beats the World

### Cannibal Was Executed

French African Colony Punishes Native Medicine Man. Dr. the last survivor of the Gambia tribe in French West Africa, has paid with his life his killing for human beings. He was executed by the French authorities that he was going too far in his disregard for civilization. Cannibalism was too much for him.

He enjoyed the reputation of being the greatest medicine man of the natives. He was a man of great wisdom and was a great healer. He was a man of great wisdom and was a great healer.

## May Arrange For Use

### Of Canadian Stamps

In Payment of Special Rate on Letters Carried by U.S. Air Mail. Prepayment in Canadian stamps of the special rate of 10 cents for the United States air mail service will be arranged for Canadians. If there is any demand for the service, Messing's stamps to the extent of the U.S. air mail to Canadian mail stamps. Postmaster-General New states that he has no reason why Canada could not be given some arrangement whereby Canadian stamps could be used for the extra 10 cents postage on letters to be transported by air.

At present, the ordinary postage of two cents can be prepaid in Canadian stamps. It is necessary by United States stamps to prepare the extra fee. It is understood that Canadian authorities have not asked for such an arrangement. No figure could be obtained here as to the number of letters being sent by people in Canada by the air mail route, now operates from coast to coast in the United States and is said to save from one to two days on ordinary postal routes.

#### NEW WHEAT POOL CONTRACTS

The Alberta Wheat Pool has not issued any new contracts. A report that these new contracts had been issued is erroneous. Members of the Wheat Pool will receive these in due course, but in the meantime are advised not to pay any attention to rumors regarding this matter. The new contracts will be for a period of five years from the date of the expiration of the present contract. Present pool members will not be charged any fee for signing the new contracts if signed before August, of 1925.

#### Duchess News

Duchess, April 14.—Mrs. A. E. Pepper returned to Calgary on Friday.

The rose carnival dance put on by the Duchess Players was very much enjoyed by those who were able to attend. Owing to the storm there was not as large an attendance as was expected.

W. H. Smith, who has spent the winter in Manhattan, Kansas, returned on Monday. He had to leave his car in Lehighville on account of the heavy snow on Saturday.

Raymond Thompson, a former resident of this community, has returned to spend the summer here.

Charlie Douglas has gone to work for Ray Lee.

Miss Laura Hole, who is attending Garbutt Business College in Calgary, arrived on Wednesday night to spend the Easter holidays with her parents, Mr. and Mrs. C. Hole.

Mrs. B. C. Holmes went to Bassano this morning, and will return Friday evening.

Miss Mabel Miller came in Wednesday from Calgary to spend the Easter holidays with her parents. She is attending Garbutt Business College.

R. C. Holmes has gone to Calgary to work.

Hans Stigen went to Idedolgh Monday night, returning Tuesday morning.

Miss Alice Ingerd, who attends Garbutt Business College in Calgary, arrived Wednesday night to spend the Easter holidays with her parents.

The Duchess Players are going to present "Baron Dubs" tonight in the Gayety Theatre, Brooks.

The play will be followed by a dance. Miss Grace Fleming, of the hospital staff at Bassano, spent Friday evening in Duchess.

The Duchess W. L. met at the home of Mrs. Hole with twelve ladies present. Mrs. Anderson and Mrs. Reed served delicious refreshments.

Mr. and Mrs. Brown, and Miss Anna Hole, of Brooks, dined at the home of Mr. and Mrs. C. Hole on Sunday.

Mr. and Mrs. Halliday's new home will soon be ready for occupancy.

Magistrate A. G. Bond and Robt. McLenn were in Glendon on business Wednesday.
